

COMPANY PROFILE
STEEL PRODUCTS & INDUSTRIAL COMPONENTS

STEEL SOLUTIONS FOR INDUSTRIAL REQUIREMENTS

A product portfolio spanning steel, piping, flow-control and connection components for a range of industrial applications.

PRODUCT RANGE

Bars • Wires • Rods • Sheets • Plates • Coils

PIPING & FLOW CONTROL

Pipes • Tubes • Valves • Fittings • Flanges

INDUSTRIAL CONNECTIONS

Ferrule fittings • Dairy fittings • Fasteners

About Prthvii

Prthvii presents a broad range of steel products and industrial components intended to support sourcing requirements across engineering, fabrication, process industries, infrastructure and other industrial sectors. The portfolio brings together core steel materials and components used in structural work, piping layouts, equipment connections and maintenance applications.

Our product categories include bars, wires and rods; sheets, plates and coils; industrial valves; pipe fittings; pipes and tubes; angles and channels; industrial flanges; instrumental ferrule fittings; dairy valves and fittings; and fasteners and nut bolts. Product selection should be based on the intended application, material grade, dimensions, operating conditions and relevant project specifications.

OUR APPROACH	WHAT TO SHARE WITH US
• Product-focused sourcing • Application-led discussions • Specification-conscious selection • Clear enquiry communication	• Product name and category • Material grade / standard, if known • Size, dimensions and quantity • Delivery location and project needs

Our Product Specialization

01 Bars, Wires & Rods Metal stock for fabrication, machining and general engineering requirements.	02 Sheets, Plates & Coils Flat steel forms for fabrication, enclosures, components and industrial projects.
03 Industrial Valves Flow-control and isolation components for suitable fluid-handling applications.	04 Pipe Fittings Components used to connect, branch, redirect or adapt compatible piping systems.
05 Pipes & Tubes Piping and tubular products for compatible process, utility and structural uses.	06 Angles & Channels Sectional steel products for frameworks, supports and fabrication.
07 Industrial Flanges Connection components for assembling compatible piping and equipment systems.	08 Instrumental Ferrule Fittings Tubing connection components for compatible instrumentation installations.
09 Dairy Valves & Fittings Valves and connection components for suitable dairy and food-processing systems.	10 Fasteners & Nut Bolts Mechanical fastening products for assembly, installation and maintenance.

Applications & Industries Served

Prthvii's product categories may support a variety of industrial and project requirements. Final suitability depends on product specifications and the operating conditions of each application.

ENGINEERING & FABRICATION Steel stock, sections, plates and fastening products for fabricated assemblies and engineering work.	OIL, GAS & PETROCHEMICAL Pipes, valves, fittings and flanges for compatible piping and process installations.
CHEMICAL & PROCESS INDUSTRIES Components for compatible fluid-handling systems, process piping and equipment connections.	POWER & ENERGY Steel products and piping components for applicable plant, utility and energy infrastructure needs.
CONSTRUCTION & INFRASTRUCTURE Sections, plates, rods and fasteners for construction and structural fabrication requirements.	DAIRY & FOOD PROCESSING Suitable valves, fittings and piping components for relevant processing installations.

Why Work With Prthvii?

Broad product categories Explore multiple steel and industrial component groups through one product portfolio.	Specification-based selection Share material, size, standard and application details to help identify appropriate options.
Application awareness Discuss requirements for fabrication, piping, infrastructure and industrial installations.	Enquiry-led support Provide a product schedule or bill of materials to make your enquiry more precise.

Product Selection Note

Pressure, temperature, corrosion, food-contact, material-grade and certification requirements vary by application. Confirm product datasheets, compliance documentation and technical suitability before specifying or ordering products for critical service.

Let's Build the Right Product List

Whether you are sourcing steel materials, piping components or industrial fittings, a clear product enquiry helps establish the right starting point. Include drawings, material schedules or technical datasheets when available.

LET'S DISCUSS YOUR REQUIREMENTS

Send us your product list, sizes, material specifications and quantities. Our website contact page is the reference point for current contact details and enquiries.
